1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cornic et al ('163).

Cornic et al ('163) differs from the limitations of independent claim 1 in having at least three transmitting and receiving antenna channels instead of at least three transmitting and receiving devices. It would have been obvious to one of ordinary skill-in-the-art that the device in Cornic et al ('163) having a single transmitter and receiver switched between at least three transmitting and receiving antennas could be replaced with a transmitter and a receiver for each antenna, the two being obvious equivalents. For the monopulse feature and for the use of adjacent transmitting and receiving devices simultaneously, please see column 6, lines 12-20 of Cornic et al ('163).

The further limitations of dependent claim 2 are fully met by Cornic et al ('163) as modified above.

With respect to the further limitations of dependent claim 3, the cyclic switching that must be produced by the apparatus in Figure 4 of Cornic et al ('163) taken together with column 6, lines 12-20 of Cornic et al ('163) must occur as claimed in claim 3. Please note items 17, 18, and 19 in Figure 4 of Cornic et al ('163).

Art Unit: 3662

The further limitations of dependent claims 4 and 5 are fully met by Cornic et al ('163) as modified above.
